And yet iatal as this plague is when neglected, there has been much unnecessary fright and hurtful terror respecting its supposed sudden attacks, and its mysterious character. Both, however, are merely scarecrow suppositions; first, because its attacks are not sudden, for Cholera in this country lies breeding in the body, two or three days before its violent symptoms of vomiting, purging, and collapse occur, and during which time its progress may without any difficulty be stopped; and, secondly, as to its mysteries, we have, we consider, satisfactorily explained and dispelled all of them in our several treatises on Cholera, its Cause and Cure, published during the past twenty years. Here we have space only to remark, that the Cholera, like the Typhus Fever, is of animalculcp. origin, and may be known by the white curdy flakes, like wool-tufts, which float in its vomits and bileless,...
