It has other more distant relatives which live in the forest trees and make wonderful burrows which look like hieroglyphics. As that remarkable entomologist, Hubbard, discovered, they are cultivators of microscopic mushrooms as wonderful as those of the mushroom nests of the ant ants or the termites of the tropics. Incidentally, and this is the important point, they kill the trees, fires start in the dead trees, and it is estimated roughly by Dr. Hopkins, the Forest Entomologist, that they destroy over a hundred million dollars worth of timber annually or, at least, are one of the principal causes of this gigantic loss. HE SHDTBD VIEE CHEEER IE EEIGHT Pelidnota punctata, Einn.) How often one sees lame butterflies limping along in their flight, because their wings have been injured by the rose bushes or by...
